

This letter is to herald the fact that since 1995, EOI has been manufacturing its wide array of products in the US. In order to be self-sufficient as possible we believe that Americans should manufacture as much as possible right here in the United States of America. We hope and trust you feel this way too.

We give credence to the American workforce and that American products are the best in the world markets. While there may be some components within our products that are outsourced globally, we source as many components that are the best and most advanced to assemble into our Luminaires. At Excellence Opto Inc, we strive to use only the best raw materials and domestically sourced subassemblies (Cree, Phillips, Littlefuse).

EOI – Excellence Opto Inc. LED luminaires, meet the requirements of the Buy American Act; Section 1605 of the American Recovery Reinvestment Act (ARRA). Made in America: www.ftc.gov/os/statutes/usajump.shtm & Buy American Act: www.arnet.gov/far/current/html/Subpart%2025_2.html or www.recovery.gov. We meet the fore mentioned guidelines along with being ISO 9000 Compliant thus assuring that our product components and final manufacturing processes are American Made.

Sincerely,

Allan Kuo

Managing Director of North America

Excellence Opto, Inc.
